Our responsibility is to express a conclusion on this interim condensed financial statements based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, ‘Review of interim financial information performed by the independent auditor of the entity’. A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed financial statements are not prepared, in all material respects, in accordance with FAS 41.

The objective of this standard is to align the accounting treatments and the reporting requirements for the Islamic financial institutions to the maximum possible extent with the generally accepted accounting principles without compromising the Shari'a requirements and nature of Islamic financial transactions and institutions. The revision of FAS 1 is in line with the modifications made to the AAOIFI conceptual framework for financial reporting. AAOIFI has issued FAS 40 in 2021. The objective of this revised standard is to establish financial reporting requirements for Islamic finance windows and applicable to all conventional financial institutions providing Islamic financial services through an Islamic finance window. This standard improves upon and supersedes FAS 18 "Islamic Financial Services Offered by Conventional Financial Institutions". This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data; and
- Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.
